

## Combi Premier ECO

Zon 1 Zon 2 Zon 3

Strong and durable combination mat with a surface layer of PET polyester, made from recycled PET bottles, a material which has good absorbency and dries rapidly. The deep-pressed pattern scrapes off thick dirt effectively, while a moulded chamfered edge around the mat holds both dirt and moisture in place. The Combi Premier is ideal in combination with a scraper mat in heavily trafficked entrances or as a single indoor mat.
