# WETTY

- Intelligent: the dial is equipped with a precision thermometer(indoor temperature of 0° C to + 50° C) and to know the temperature and indoor humidity rate ( 30% to 100%) of your environment job.
- Modern design: its sober shape and its metallic gray outline allow it to adapt to all the decor from the most classic to the most contemporary.
- Readability: a 30 cm dimension for maximum readability up to 35 m thanks to its white contrast on a black background.
- Robustness: thanks to its steel frame, this clock with beautiful finishes withstands any test.
- Ergonomics: thanks to its quiet system, the second hand emits no noise creating a framework conducive to concentration for work.
- Operation: powered by a batteries supplied
- Dimensions: diameter 30 cm
- Thickness: 4,5 cm
- Weight: 0.58 kg
- Warranty 2 years
- Quick wall fixing with 1 eyelet
- Materials: steel frame / flat mineral glass lid

# UNILUX'S ADVICES

## 1- Why use a clock?

A clock is a must-have accessory that fits perfectly into any room in your business: individual office

- open space
- meeting room
- Passing places
- lobby

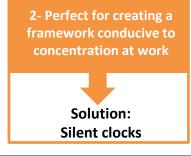

Setting up a clock in a workspace allows employees to avoid checking the time on the smartphone or tablet time and therefore not be tempted to look at their messages or browse the internet by same occasion. Thus a clock allows to gain in concentration and productivity because the employees are less distracted.

For good readability from a distance, it is important to have:

- good contrast between the background of the dial and the color of the numbers (better contrast with white background / black numbers)
- A good height of the figures (about 3cm minimum) and in Arabic characters preferably

In addition, the choice of a clock can be made according to different needs on the part of the consumer.

# 2- Some definitions

#### Quartz system

The quartz pendulum mechanism, based on the piezoelectric phenomenon, is one of the least energy-consuming, with a reliability of one second deviation in 6 years of operation.

## Radio-controlled system

The time is automatically and permanently adjusted by radio waves from the Mainflingen atomic clock (high precision: 1 second difference maximum in 1 million years)

### Step movement

Second-hand movement of the second hand

#### Sweep movement

Continuous movement of the second hand
